

SMARTBRIDGE PROJECT

Implement Client Script & UI Policy (Incident)

PHASE 2

Phase 2 - Requirement Analysis

Technology Track: ServiceNow Administrator

Team Leader: M. Mohamed Akmal

Team Members:

E. Kaviyaran

D. Lingeshwaran

K. Karuppaiyah

1. Functional Requirements

ID	Requirement
FR-01	[Add exact details from the SmartBridge Project Document]
FR-02	[Add exact details from the SmartBridge Project Document]
FR-03	[Add exact details from the SmartBridge Project Document]
FR-04	[Add exact details from the SmartBridge Project Document]

Note: Do not invent the exact Client Script or UI Policy conditions. The exact Client Script logic, UI Policy conditions, fields and expected behaviour must be taken from the SmartBridge Project Document and Reference Video. Fields marked in square brackets are placeholders to be filled from that document.

2. Non-Functional Requirements

Attribute	Description
Usability	Incident form behaviour should be clear and easy for users to follow.
Reliability	Configured behaviour must work consistently every time the form is used.
Maintainability	Scripts and policies should be named clearly and be easy to update.
Performance	Client-side logic must run without noticeable delay on form load or field change.
Security	Only authorised users (admin role) can configure scripts and policies; no sensitive data is exposed.

3. Hardware Requirements

- Laptop / Desktop
- Internet connection

4. Software Requirements

- Web browser
- ServiceNow instance
- GitHub
- Microsoft Word or Google Docs
- PDF reader
