

SMARTBRIDGE PROJECT

Implement Client Script & UI Policy (Incident)

PHASE 5

Phase 5 - Development Report

Technology Track: ServiceNow Administrator

Team Leader: M. Mohamed Akmal

Team Members:

E. Kaviyaran

D. Lingeshwaran

K. Karuppaiyah

Development Overview

Development was completed inside ServiceNow. Screenshots of each important step are stored in the **Screenshots/** folder using the names listed below.

Note: The exact Client Script logic, UI Policy conditions, fields and expected behaviour must be taken from the SmartBridge Project Document and Reference Video. Fields marked in square brackets are placeholders to be filled from that document. Add the Actual Result after testing on your instance.

Screenshot 1: ServiceNow Instance

Field	Details
Screenshot Number	01 (01-ServiceNow-Instance.png)
Screenshot Title	ServiceNow Instance
Purpose	Confirm access to the working ServiceNow instance.
Configuration	Log in to the developer/admin instance.
Expected Behaviour	The configuration saves successfully and behaves as required.
Actual Result	[To be filled after testing]

Screenshot 2: Incident Module

Field	Details
Screenshot Number	02 (02-Incident-Module.png)
Screenshot Title	Incident Module
Purpose	Show the module/table on which the work is done.
Configuration	Navigate to Incident > All / Create New.
Expected Behaviour	The configuration saves successfully and behaves as required.
Actual Result	[To be filled after testing]

Screenshot 3: Client Script Configuration

Field	Details
Screenshot Number	03 (03-Client-Script-Configuration.png)
Screenshot Title	Client Script Configuration
Purpose	Client Script defines dynamic client-side behaviour.
Configuration	Create the Client Script on the Incident table (name, type, field, active). [Add exact details from the SmartBridge Project Document]
Expected Behaviour	The configuration saves successfully and behaves as required.
Actual Result	[To be filled after testing]

Screenshot 4: Client Script Code

Field	Details
Screenshot Number	04 (04-Client-Script-Code.png)
Screenshot Title	Client Script Code
Purpose	The script contains the logic executed in the browser.
Configuration	Add the script code. [Add exact details from the SmartBridge Project Document]
Expected Behaviour	The configuration saves successfully and behaves as required.
Actual Result	[To be filled after testing]

Screenshot 5: UI Policy Configuration

Field	Details
Screenshot Number	05 (05-UI-Policy-Configuration.png)
Screenshot Title	UI Policy Configuration
Purpose	UI Policy controls field/form behaviour by condition.
Configuration	Create the UI Policy on the Incident table with its conditions. [Add exact details from the SmartBridge Project Document]
Expected Behaviour	The configuration saves successfully and behaves as required.
Actual Result	[To be filled after testing]

Screenshot 6: UI Policy Action

Field	Details
Screenshot Number	06 (06-UI-Policy-Action.png)
Screenshot Title	UI Policy Action
Purpose	UI Policy Actions apply the required field changes.
Configuration	Configure the UI Policy Actions (mandatory / visible / read-only). [Add exact details from the SmartBridge Project Document]
Expected Behaviour	The configuration saves successfully and behaves as required.
Actual Result	[To be filled after testing]

Screenshot 7: Incident Form - Before

Field	Details
Screenshot Number	07 (07-Incident-Before.png)
Screenshot Title	Incident Form - Before
Purpose	Baseline of the form before the behaviour is triggered.
Configuration	Open a new Incident record without triggering conditions.
Expected Behaviour	The configuration saves successfully and behaves as required.
Actual Result	[To be filled after testing]

Screenshot 8: Incident Form - After

Field	Details
Screenshot Number	08 (08-Incident-After.png)
Screenshot Title	Incident Form - After
Purpose	Shows the form after the condition is triggered.
Configuration	Trigger the configured condition and capture the change.
Expected Behaviour	The configuration saves successfully and behaves as required.
Actual Result	[To be filled after testing]

Screenshot 9: Final Output

Field	Details
Screenshot Number	09 (09-Final-Output.png)
Screenshot Title	Final Output
Purpose	Final proof that the requirement works end to end.
Configuration	Submit the Incident and capture the final result.
Expected Behaviour	The configuration saves successfully and behaves as required.
Actual Result	[To be filled after testing]
