

SMARTBRIDGE PROJECT

Implement Client Script & UI Policy (Incident)

PHASE 6

Phase 6 - Test Report

Technology Track: ServiceNow Administrator

Team Leader: M. Mohamed Akmal

Team Members:

E. Kaviyaran

D. Lingeshwaran

K. Karuppaiyah

1. Testing Responsibility

Testing and validation were assigned to **D. Lingeshwaran**.

2. Test Cases and Results

ID	Scenario	Expected Result	Actual Result	Status
TC-01	Open Incident form	Form loads correctly	[Fill after execution]	Pending
TC-02	Trigger Client Script condition	Required configured behaviour occurs	[Fill after execution]	Pending
TC-03	Trigger UI Policy condition	UI changes according to configuration	[Fill after execution]	Pending
TC-04	Change relevant field	Configured dynamic behaviour occurs	[Fill after execution]	Pending
TC-05	Submit Incident	Record submits according to configuration	[Fill after execution]	Pending

Note: Replace the generic scenarios with the exact test conditions from the SmartBridge project requirements, then update Actual Result and Status (PASS/FAIL) after running each test on your instance.

3. Conclusion

After execution, summarise the total, passed and failed test cases here.
