

SMARTBRIDGE PROJECT

Implement Client Script & UI Policy (Incident)

PHASE 7

Phase 7 - User Guide

Technology Track: ServiceNow Administrator

Team Leader: M. Mohamed Akmal

Team Members:

E. Kaviyaran

D. Lingeshwaran

K. Karuppaiyah

1. Purpose

This guide explains how to use the Incident form with the configured Client Script and UI Policy.

2. Steps to Use

- Log in to the ServiceNow instance.
- Open **Incident > Create New** (or open an existing Incident).
- Fill in the fields. When the configured condition is met, the form responds automatically. [Add exact details from the SmartBridge Project Document]
- Change the relevant field to see the dynamic behaviour.
- Complete any fields marked mandatory, then click **Submit**.

3. Troubleshooting

- Behaviour not appearing: refresh the form and check the scripts/policies are Active.
- Field not editable or missing: check the UI Policy conditions.
- Contact the ServiceNow administrator for configuration issues.
